

THUNDERBOLT[®]

Safe Concrete Dissolver

FEATURES:

- No harsh acids
- 100% Biodegradable
- Non-Corrosive (ASTM-G31)
- Non-DOT regulated (DOT E 10904)
- One step application

Tested And Approved By:

McNeilus[®]

An Oshkosh Corporation Company

**SAFE
ALTERNATIVE**

BENEFITS:

- No neutralizing needed
- Economical
- Easier on equipment, safe on virtually every surface
- Little or no skin irritation
- Faster cleaning

Thunderbolt is designed to uniquely attack concrete, cement, stucco, mortar, and grout by softening buildup into a mud that easily rinses away. Its safe formulation is designed to remove concrete from ready mix trucks, gunite trucks, pump trucks, concrete saws, pavers, molds, curb machines, tankers, forms and other concrete tools and equipment. Thunderbolt cleans with the power of an acid but is mild enough for hand washing of equipment with little or no skin irritation, and no secondary soap is needed for neutralizing.
